SUMMARY OBJECTIVE

Motivated Information Technology graduate with hands-on experience in software development and technologies. Proven ability to work effectively in a team and deliver projects on time. Seeking an IT role to apply my skills, contribute to success, and gain more experience in web/application development and others.

EDUCATIONS

UiTM Campus Kuala Terengganu, Terengganu

Sept 2019 – May 2023

Bachelor Degree of Information System Hons. Business Computing

WORK EXPERIENCE

Digital Adage Sdn Bhd, Selangor

Oct 2024 – Present

Programmer

- Designed responsive layouts and created design mockups to visualize and refine UI/UX concepts, ensuring seamless usage across devices and compliance with accessibility standards, which boosted mobile user engagement by 100%.
- Enhanced our digital product, wasep.me features based on customer feedback, improving functionality, usability, and overall user satisfaction.
- Deployed code to QA environments for testing, reviewing and resolving issues before release to production and utilized Git version control on GitHub.

PETRONAS Chemicals Ethylene & Polyethylene Sdn Bhd, Terengganu

Aug 2023 – July 2024

PROTÉGÉ-GEES Human Resources

- Compiled and optimized data collection to create and deploy the HR dashboard and EPE Working Standard dashboard for real-time reporting and analyzing data trends accurately, using Power BI.
- Developed the TraineeHUB Management System using OutSystems and deploy the project using OutSystems Cloud Infrastructure, ensuring the master database and trainee allowances form is safely recorded within the system.
- Collaborated with other departments to create an e-Register Safety Briefing using OutSystems and implemented CI/CD deployment using OutSystems Cloud Infrastructure, ensuring a seamless registration process, slot filling, and email automation within the system.
- Led the e-Parcel Notification System project, developing the system using PowerApps, Power Automate and SharePoint database to enhance data management and improve customer service.
- Troubleshoot IT issues, including printer driver connectivity, Excel data manipulation, and sharing IT information within the department through network configuration and system administration

Pande Media (M) Sdn. Bhd, Kelantan

Sept 2022 – Jan 2023

Information Technology Intern

- Developed the Learning Management System using WordPress to commercialize learning content for over 40 clients, ensuring they can access and learn modules of Trainee The Marketer in the Learning Portal.
- Managed and updated the contents of modules in compiling the videos for more than 12 courses in Learning Portal.
- Integrated the existing Wasap.my (SaaS) system to revamp the interface and applied the responsive web design and UI/UX standards for a more intuitive design using custom CSS, Bootstrap, JavaScript, and creative tools.
- Added new features and modules to Wasap.my for both admin and user sites using PHP, optimizing data retrieval and data export for admins and providing a biolink feature for users.
- Troubleshoot and debugged subscription expiry issues for users in the backend (MySQL), eliminating the need for daily manual data updates.
- Developed and deployed a Help System integrated with Wasap.my to record user feedback for database management and improve customer service and experience by 90%, using PHP CodeIgniter.
